Asnaghi Interiors s.r.l. LAS-Chair- iLT-Table
arch. Davide Tresoldi

Mixture between the classic and the contemporary; a chair supported by two classic legs and a modern one; In the same way you sit down on the modern while your back leans on the classic. The Table combines classic and contemporary style. The legs have a classic cut and are fixed on a glass structure with a classic profile, but with a back-painting showing a modern rectangle.

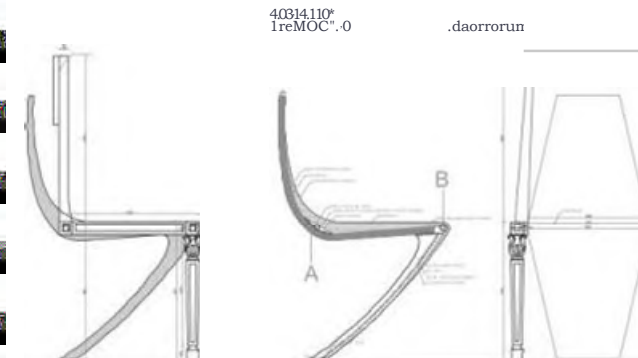

Asnaghi Interiors s.r.l. LAS-Chair - iLT-Table
Progetta arch. Davide Tresoldi

Intersezione tra classico e contemporaneo, una sedia che si sostiene con due gambe classiche e una moderna, così come la seduta avviene sul moderno mentre la schiena poggia sul classico. Il Tavolo unisce lo stile classico al contemporaneo. Le gambe intagliate e classiche si fissano su una struttura in vetro dal profilo classicheggiante ma con una colorazione retroverniata che scandisce un rettangolo moderno.

Meda MB — Shed show room arch.
 Davide Tresoldi
 co-progettista arch.tti A. Asngahi, R. Galliani

The project consists in the feasibility study of a building used as a museum, for representation and events on behalf of a furniture company based in the town of Meda. The building stands out for its formai peculiarity and gives the company a greater visibility.

Meda MB - Capannone show room
 arch. Davide Tresoldi
 co-progettista arch.tti A. Asngahi, R. Galliani

Il progetto consiste nello studio di fattibilità di un edificio con destinazione museale, rappresentanza ed eventi per un'azienda del mobile con sede nel comune di Meda. L'edificio si propone nella sua singolarità formale come elel-mento di richiamo e di riconoscibilità dell'azienda stessa.

Seregno MB - Shed- show room 3000 sqm

arch. Davide Tresoldi co-progettista arch.tti A. Asngahi, R. Galliani

The project concerns the construction of a shed becoming the image of the company itself. A protruding volume covered in Alucobond with a large exhibition window projecting over a water pool has been inserted in the prefabricated building. The entrance to the show room is through a walkway suspended above the water pool penetrating through a black volume in the structural glass wall. The sculptural staircase inside is made of metal coated in wood and supported by inclined pillars.

Seregno MB — Capannone show room 3000mq

Progettista/DL arch. Davide Tresoldi co-progettista arch tti A. Asngahi, R. Galliani Il progetto riguarda la costruzione di un capannone che diventi icona ed immagine dell'azienda stessa. All'edificio prefabbricato è stato inserito un volume sporgente rivestito in "Alucobond" con un'ampia vetrata espositiva che aggetta sopra una vasca d'acqua. L'ingresso all'esposizione avviene tramite una passerella sospesa sulla vasca d'acqua che attraverso un volume nero penetra nella vetrata strutturale. la scala scultorea al suo interno è metallica rivestita in legno e sostenuta da piloni inclinati.

prospetto SUD

Giussano MB — Onlus centro diurno X-Lam 400mq
Progettista/OL arch. Davide Tresoldi

The project concerns the construction of the headquarters of the "Atipica Cooperativa Sociale Onlus" (www.atipica.org) that operates on the territory of the province of Monza Brianza. The design choice was clear and strong at the same time from the first meetings with the non-profit cooperative: a building representing the path of the child's development, a path defined by the asymmetric reinforced concrete partitions accompanying within the "experience" of the day center. The building is formed by two wooden volumes "anchored" to the spine in reinforced concrete. The project has been published on N.13 - 10/2013 - "LEGNO ARCHITETTURA" - Edicom

Giussano MB — Onlus centro diurno X-Lam 400mq

Progettista/DL arch. Davide Tresoldi Il progetto riguarda la costruzione della sede operativa di "Atipica Cooperativa Sociale Onlus". La scelta progettuale, fin dai primi incontri con la cooperativa, è stata chiara e forte al tempo stesso: un edificio che rappresenti il percorso di sviluppo del minore, definito da setti in cemento armato asimmetrici, che accompagni dentro "l'esperienza" del centro diurno. L'edificio è formato da due volumi in legno "ancorati" alla spina dorsale in cemento armato. Il progetto è stato pubblicato sul N.13 - 10/2013 - "LEGNO ARCHITETTURA" - Edicom

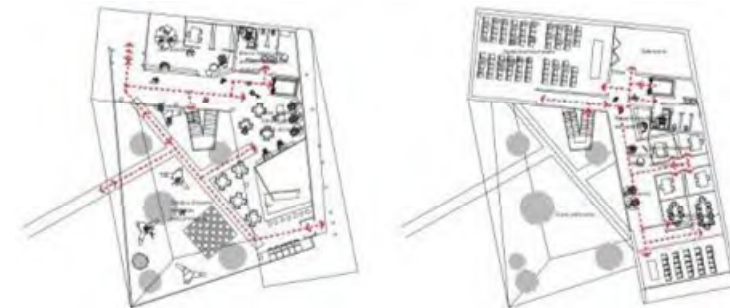

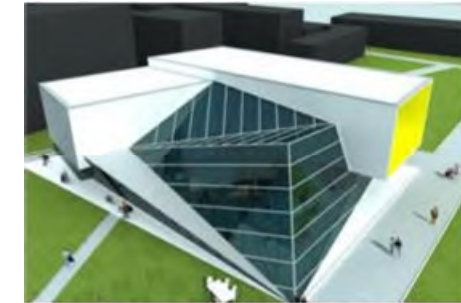

Civic Centre Milano
 arch. Francesco Aiello, arch. Davide Tresoldi, arch. Michele Stillittano, Studio MSC
 Associati

The ground floor is a unique transparent multi-function and multi-sensory space. The second floor is formally made up of two volumes growing on the north and east side, protecting the winter garden from the "cold north winds". The second floor host those functions requiring a greater intimacy such as rooms for associations, rehearsal rooms, advisory office. The greenhouse enclosing the winter garden is the main heating and cooling source of the building. The vegetation inside has the function to regulate humidity and air quality.

Centro Civico Milano

arch. Francesco Aiello, arch. Davide Tresoldi, arch. Michele Stillittano, Studio MSC
 Associati

Il piano terra costituisce un unico spazio multifunzione, trasparente e multisensoriale. Il secondo piano è formalmente costituito da due volumi che si sviluppano sul lato nord ed est proteggendo il giardino d'inverno dai "venti freddi del nord". Il secondo piano ospita quelle funzioni che richiedono una maggiore "intimità" quali gli spazi per le associazioni, sala prove, uffici di consulenza. la serra che racchiude il giardino d'inverno è la principale fonte di calore e rinfrescamento dell'edificio. La vegetazione all'interno del giardino avrà la funzione di regolatrice dell'umidità e della qualità dell'area

Man Reval — abitare la montagna - Bardonecchia arch. Francesco Aiello, arch. Davide Tresoldi

The designed volumes are inspired both by the natural environment (mountains) and by the urban context. The skyline of the mountains is recalled by the green roofs that in some places create covered spaces for common use interrupting the building front. The main feature of the south side are the winter gardens that besides guaranteeing an energy support, broadly embrace the opposite valley.

Jrcn. urancesco

Plan Reval — abitare la montagna - Bardonecchia
area. L/dvide rresoldi

I volumi progettati si Ispirano sia al contesto naturale (montagne) che urbanizzato (tipologie esistenti). Lo skyline delle montagne é richiamato delle coperture verdi che in alcuni punti creano degli spazi coperti ad uso comune che interrompono il fronte costruito. Il prospetto sud è caratterizzato da giardini d'inverno che oltre a garantire un aiuto energetico, abbracciano con ampie visuali la vallata antistante.

**Ospedaletti 5V — 2016 Theatre 2000 places, renovation

arch. Francesco Aiello, arch. Davide Tresoldi

Secondary volumes branch off from a central core, generating large terraces.
The covering of these volumes with wood gives a welcoming and dynamic
image to the whole complex at the same time.

Cesano Maderno MB - Studio di fattibilità 'residenze Bramante'

arch. Francesco Aiello, arch. Davide Tresoldi

Da un nucleo centrale si articolano volumi secondari che sbalzano
generando ampi terrazzi. Il rivestimento di alcuni volumi con materiale
legnoso dà un'immagine accogliente e dinamica nello stesso tempo
all'intero complesso.

Moda MB - Private residence - X-Lam arch. Francesco Aiello,
arch. Davide Tresoldi

Single family dwelling with an high performance climate control thanks to a wooden construction system. the X-lam.

Meda MB - Residenza privata - X-Lam arch. Francesco
Aiello. arch. Davide Tresoldi

Villa singola con ottime prestazioni energetiche grazie al sistema costruttivo
in legno X-lam.

Courmayeur AO - Feasibility study for an hotel arch.

Francesco Aiello, arch. Davide Tresoldi

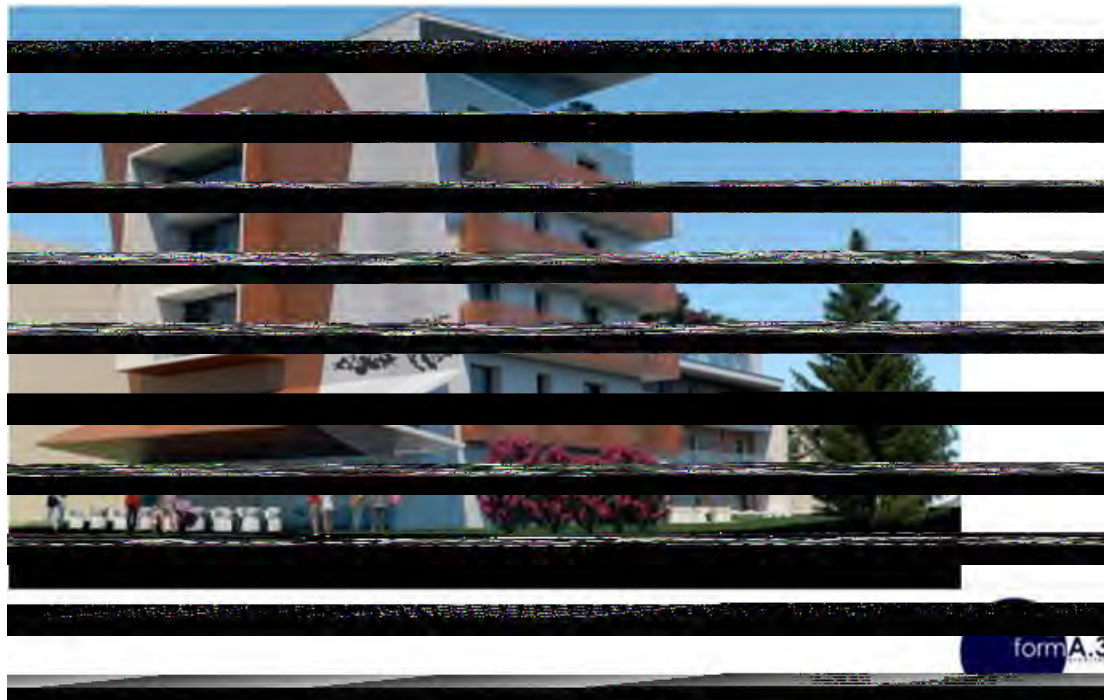

The volumes reflect the pre-existing structure giving dynamism to the new building. The construction technology is in X-lam aimed at a performance energy containment as well as the solar shading proposed on the south facing terraces. The wood on the facade gives the complex a mountain language without sacrificing a contemporary image.

Courmayeur AO - Studio di fattibilità per albergo arch.

Francesco Nello, arch. Davide Tresoldi

I volumi riprendono la struttura preesistente dando dinamicità al nuovo edificio. La tecnologia costruttiva è in legno X-lam finalizzata ad un contenimento energetico prestazionale così come le schermature solari proposte sui loggiati delle camere a sud. Il legno in facciata dà al complesso un linguaggio montano senza rinunciare ad un'immagine contemporanea.

 Aesthetic upgrading of a production
 building facade

Meda MB — 2010
 Private penthouse 250 sqm
 arch. Davide Tresoldi
 The cantilever roof arises from the
 need to protect the existing balcony of
 the penthouse, the chosen solution
 consists of a glass structure that follows
 the trend of covering alternated with
 "suspended" volumes in iron covered
 with wooden strips.

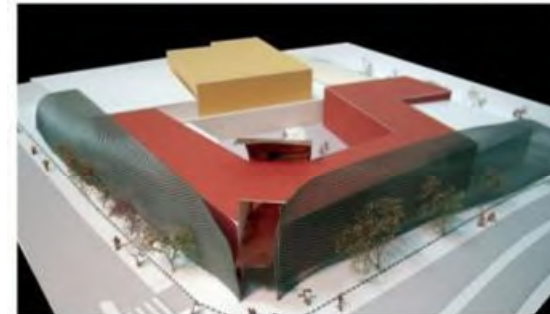

Meda MB — 2010
 Residential complex 1350 sqm
 arch. Davide Tresoldi, arch. Francesco Aiello

The building has been partially renovated
 and partially of new construction.
 The choice of varying the style of the
 facade along the Manzoni street helps to
 highlight the difference between the
 restored part and the new part by a
 gradual transition from the recovery of the
 pre-existing decoration towards the
 inclined gray planes.

Seregno MB — 2010
 Private villa
 arch. Davide Tresoldi

 arch.tti A. Asngahi, R. Galliani
 Restoration of a town villa

Cittadella dell'Edilizia **Como**
 arch. Davide Tresoldi

Being the site poorly characterized from
 the architectural point of view, we have
 chosen to create a structure that would
 stand out in the surrounding context
 playing the role of focal point of the
 area. To achieve this goal it has been
 decided to provide the building on the
 main fronts with a double "skin" having
 the triple function of architectural
 element of strong visual impact,
 sunshade and fence.

Redevelopment of the Umberto I square Besana Brianza
 arch. Francesco Aiello, arch. Elena Busnelli, arch. Davide Tresoldi
 Redevelopment of the space by means of both street furniture and the pavement oriented according to the cultural/ historical references present on the site. The covering of the access ramp to the basement becomes a sculptural element as opposed to the pedestrian square volume which tends to vanish through the mirror walls.

SENEGAL- 2011
Prefabricated houses
 arch. Francesco Aiello
 arch. Davide Tresoldi
 Feasibility study of a prefabricated housing unit to be offered on the Senegalese market. Steel structure with isolated panels in fibrocement. The terrace is protected from the sun with a folding horizontal curtain or wooden sunshades.

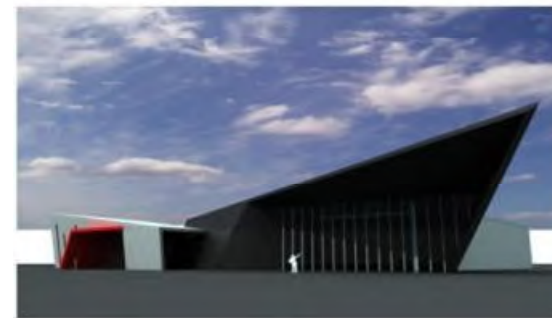

Lazzate MB Attic 200 sqm X-Lam technology
 arch. Davide Tresoldi
 Recovery of the attic for the construction of a new residential unit with perimeter walls in X-Lam. The building technology in X-Lam has made it possible not to overload the existing building and to have a bearing perimeter of rock wool with a high energy performance. The installed equipment is a air-water heat pump powered by photovoltaic and thermal solar panels.

Monza MB - Residential complex
 arch. Frx Davide Tresoldi
 The residential complex consists of 6 two-family homes. The complex is energy efficiency class A and it is heated by a centralized air-water heat pump with photovoltaic system placed on the house roofs and a plant for the air treatment. The shape of the roof, the dormer windows and the cantilever roofs have been designed to give dynamism to the residential volume.

"Italian" lift - Italian delegation building
arch. Francesco Aiello
arch. Davide Tresoldi
Project of a lift recalling the Italian flag.

Cologno Monzese MB — Upgrading
production building GKM Stromag Italia
SPA
arch. Francesco Aiello arch. Davide
Tresoldi
The project arises from the need to
make the entrances to the offices of the
raised ground floor and of the first floor
independent and autonomous. Two
separate volumes are then designed,
differing in shape and colour,
highlighting the entrances. The red
volume contains the new iron staircase
designed to reach the first floor.

Plan Reval — abitare la montagna-
Bardonecchia a cl i:a::cr:cu nello,
arch. Davide Tresoldi
The designed volumes are inspired both
by the natural environment and by the
urban conte«. The skyline of the
mountains is recalled by the green roofs
that in some places create covered
spaces for common use interrupting the
building front. The main feature of the
south side are the winter gardens that
besides guaranteeing an energy support,
broadly embrace the opposite valley.
